

Arash MohammadGholinejad

Backend Developer | C# · ASP.NET Core · Python · Django · FastAPI · Flask

arash.m.gholinejad@gmail.com | LinkedIn | GitHub

PROFILE

Backend developer working in both C#/.NET and Python, comfortable switching between them depending on what a project needs. Enjoys difficult problems, learns quickly, and works well independently. Keeps personal projects open source on GitHub and contributes fixes to other open-source projects when possible.

EXPERIENCE

Software Engineer · Metable Dec 21, 2024 – Sep 22, 2026

- Developed and maintained the company's software products.

Software Engineer · Hamkaran System Jul 24, 2024 – Dec 20, 2024

- Developed and maintained enterprise (ERP) applications on the in-house Rahkaran framework.
- Worked within existing enterprise systems, implementing and maintaining business functionality.

C# · ASP.NET

Software Engineer · Alborz Afraz Tabarestan (Dornica) Jul 23, 2023 – Jun 20, 2024

- Developed and maintained backend services and RESTful APIs.
- Designed and implemented an API Gateway service for centralized API management, routing and integration across services.
- Built an online ArcGIS validation service and ArcGIS plugins for automated data/config validation and GIS workflows.
- Refactored and modernized multiple projects, improving architecture, performance and maintainability.

Python · FastAPI · Celery

Software Engineer · Zarebin (Hamrah Aval Internship) Oct 2022 – Feb 2023

- Developed and maintained backend services.
- Designed and implemented RESTful APIs and managed database operations.

Python · Django

Software Engineer · Jadooye Fekr (Internship) Jun 2020 – Sep 2020

C# · ASP.NET · Web Forms

PROJECTS

IMDB (GitHub)

IMDb-style movie and series API on ASP.NET Core 8 using Clean Architecture and tactical DDD (aggregates, value objects, invariant-enforcing entities); 45 MediatR commands and queries, ASP.NET Identity with JWT and role-based access, EF Core migrations, and GitHub Actions CI.

C# · ASP.NET Core · MediatR · EF Core · SQL Server · xUnit · Docker

ProductKrait (GitHub) · (Live Demo)

E-commerce platform built with Django: product catalog with categories, shopping cart, orders, payments and email OTP verification, a staff dashboard for product and order management, and a JWT-secured REST API (DRF) documented with Swagger/ReDoc.

Python · Django · DRF · JWT · Docker

Store Management (GitHub)

Store REST API on ASP.NET Core 8 split into Domain, Application, Infrastructure, Persistence and Web API layers; customers sign up and log in with JWT authentication and PBKDF2-hashed passwords, browse a filterable, paginated catalog and place stock-validated orders saved atomically; EF Core migrations and GitHub Actions CI.

C# · ASP.NET Core · EF Core · SQL Server · AutoMapper · Docker

AdderHub (GitHub) · (Live Demo)

Instagram-style social network built with Django, served as server-rendered pages and a JWT-secured REST API (DRF) from one codebase; supports image posts, likes, comments, follow/unfollow and user search, with Redis caching, UUID keys and automated tests.

Python · Django · DRF · Redis · Docker

TECHNICAL SKILLS

Languages & Frameworks: C# / .NET 8 (ASP.NET Core Web API, MVC, Entity Framework Core, LINQ, MediatR, AutoMapper, xUnit);

Python (Django, DRF, FastAPI, Flask, Celery, SQLAlchemy, Pytest)

Databases & Caching: SQL Server, PostgreSQL, MongoDB, Redis

Tools & DevOps: Docker, Git, GitHub Actions (CI), Swagger/OpenAPI

Core Areas: Backend Development, RESTful API Design, Clean Architecture, Domain-Driven Design, CQRS, Authentication & Authorization (JWT, RBAC), API Gateway, Microservices Architecture

Principles & Practices: OOP, SOLID, Design Patterns, TDD, Refactoring

EDUCATION

B.S. in Computer Engineering

Babol Noshirvani University of Technology

2016 – 2021

Served as a teaching assistant for programming courses.

COURSES AND CERTIFICATES

Machine Learning Specialization — Coursera, Feb 2024

Deep Learning Specialization — Coursera, Mar 2024
